EDUCATION

B.P. Poddar Institute of Management and Technology

Expected May 2027

B.Tech in Electronics & Communication Engineering (ECE) — GPA: 7.0

Kolkata, WB

- Affiliated to Maulana Abul Kalam Azad University of Technology, West Bengal (MAKAUT)
- **Relevant Coursework:** Data Structures & Algorithms, OOP, DBMS, Computer Networks

OPEN SOURCE CONTRIBUTIONS

idurar/idurar-erp-crm

May 2026

Open Source Contributor | PR #1446 (Open) | Node.js · Express.js · JWT · MongoDB · REST API

- Implemented Role-Based Access Control (RBAC) middleware on a production-scale open-source ERP/CRM platform; restricted `POST /api/client/create` to admin users, blocking unauthorised staff access entirely.
- Structured the PR with conventional commits (`feat:`, `chore:`), validated both admin and staff role flows end-to-end via Postman, and provided documented test steps with screenshots for maintainer review.
- Explored large-scale open-source codebases — AppFlowy (Dart) and Focalboard (TypeScript) — studying real-world architecture patterns to broaden full-stack engineering understanding.

PROJECTS

Login Authentication System | Node.js, Express.js, JWT, MongoDB, bcrypt, REST API

- Implemented secure user registration and JWT-based role authorisation with protected route middleware, ensuring reliable and authenticated client-server communication throughout the application.
- Engineered bcrypt password hashing for all credentials, hardening backend security and eliminating plaintext credential exposure across all protected API endpoints.

Personal Portfolio Website | Node.js, Express.js, MongoDB, JWT, HTML, CSS, JavaScript

- Developed a full-stack portfolio with dynamic routing and data models on Node.js and Express.js, deployed to a production Render environment with zero downtime.
- Built a fully responsive frontend in HTML, CSS, and JavaScript integrated with JWT-secured APIs and MongoDB persistence, delivering a seamless end-to-end user experience.

Math Game | HTML, CSS, JavaScript

- Developed an interactive arithmetic challenge application with real-time answer validation, improving users' problem-solving speed and logical reasoning through instant feedback loops.

Dictionary Web Application | HTML, CSS, JavaScript, REST API

- Built a word-search app consuming a third-party Dictionary REST API; demonstrated DOM manipulation, asynchronous API integration, and dynamic content rendering with a clean, responsive UI.

TECHNICAL SKILLS

MERN Stack: MongoDB, Express.js, React.js, Node.js

Languages: JavaScript (ES6+), C, C++, Java, SQL

Web Technologies: HTML5, CSS3, REST APIs

Testing: Cypress (Automated Testing), Postman (API Testing)

Tools & Platforms: Git, GitHub, VS Code, IntelliJ IDEA, Render, Netlify, Vercel

Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)

ACHIEVEMENTS & MENTORSHIP

- Participated in college-level technical workshops on Web Development and Programming best practices.
- Completed mentorship sessions on MERN stack fundamentals and industry-standard development workflows.
- Active participant in college technical and cultural activities, demonstrating consistent teamwork and leadership initiative.
