EDUCATION

B.P. Poddar Institute of Management and Technology

Expected May 2027

B.Tech in Electronics & Communication Engineering (ECE) | GPA: 7.0

Kolkata, WB

- Affiliated to Maulana Abul Kalam Azad University of Technology, West Bengal (MAKAUT)
- Relevant Coursework:** Data Structures & Algorithms, OOP, DBMS, Computer Networks

OPEN SOURCE CONTRIBUTIONS

idurar/idurar-erp-crm

May 2026

Open Source Contributor | PR #1446 (Open) | Node.js · Express.js · JWT · MongoDB · REST API

- Developed and implemented Role-Based Access Control (RBAC) middleware on the production-scale open-source idurar-erp-crm platform using Node.js and Express.js, securing 5+ admin API routes against unauthorized access.
- Structured and delivered a production-ready pull request using conventional commits (feat., chore.), validated role-based admin/staff workflows end-to-end through Postman API testing, and streamlined maintainer review workflows with documented test cases and screenshots.
- Analyzed large-scale open-source codebases including AppFlowy (50K+ GitHub stars) and Focalboard to study large-scale backend architecture, modular project structures, and real-world collaborative development practices.

PROJECTS

Login Authentication System | Node.js, Express.js, React.js, JWT, MongoDB, bcrypt, REST API

Live

- Engineered a secure authentication and authorization system using JWT, Express.js, and protected middleware, enabling role-based access control across 6+ protected API routes.
- Integrated bcrypt password hashing and credential security mechanisms to protect sensitive user data, strengthen backend authentication reliability, and eliminate plaintext password exposure risks.

Personal Portfolio Website | Node.js, Express.js, MongoDB, JWT, HTML, CSS, JavaScript

Ongoing

- Built and deployed a production-ready full-stack portfolio application using Node.js, Express.js, MongoDB, and scalable routing architecture, ensuring reliable backend performance and production deployment on Render.
- Designed and developed responsive frontend interfaces using React.js, HTML, CSS, and JavaScript integrated with JWT-secured REST APIs and MongoDB persistence, delivering a seamless end-to-end user experience across devices.

Math Game | HTML, CSS, JavaScript

Live

- Created an interactive JavaScript-based arithmetic challenge application with real-time answer validation, dynamic scoring logic, and instant feedback mechanisms to improve user engagement and logical reasoning skills.

Dictionary Web Application | HTML, CSS, JavaScript, REST API

Live

- Implemented a responsive dictionary web application using third-party REST APIs, asynchronous JavaScript operations, dynamic DOM manipulation, and real-time content rendering for enhanced user experience.

TECHNICAL SKILLS

MERN Stack: MongoDB, Express.js, React.js, Node.js

Languages: JavaScript (ES6+), C, C++, Java, SQL

Web Technologies: HTML5, CSS3, REST APIs

Testing: Cypress (Automated Testing), Postman (API Testing)

Tools & Platforms: Git, GitHub, VS Code, IntelliJ IDEA, Render, Netlify, Vercel

Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)

WORKSHOPS & LEARNING

- Completed hands-on learning in MERN stack development, REST APIs, authentication systems, and backend workflows.
- Practiced API testing, debugging, and workflow validation using Postman and Cypress testing fundamentals.
- Studied large-scale open-source codebases to understand modular project structures and collaborative development workflows.
